Subject: RE: Re[2]: Membership Request

Dear Board Members,

I appreciate the time and effort that has gone into your responses. I want to be clear that my request and actions have been fully compliant with ONCA and the League's own Privacy and Record Retention Policy.

To date, I have:

- Made a lawful written request under ONCA ss.95–96;
- Submitted the required statutory declaration;
- Narrowed my request to exclude any personal address information, except city, that could put minors at risk;
- Requested only the city of each member's service address, along with the member's name, class, email (where consented), and membership start date as required by O. Reg. 395/21 s.6(3); and
- Acted in good faith for the lawful purpose of member-to-member communication and verification of voting eligibility, both permitted under ONCA s.96(5).

ONCA gives every member the right to communicate with other members about the affairs of the corporation. Ensuring that this right is respected is a shared responsibility of the entire Board, and each director is accountable under ONCA ss.46–47 for the League's compliance with the Act and its regulations.

I recognize that these matters can be complex, and I want to give the Board every opportunity to review this further or obtain a second opinion. If the League chooses to reconsider and provide a compliant member register as outlined above by Wednesday, October 15, I will treat the matter as resolved internally. If no further action is taken by that time, I will consider the Board's decision final.

Thank you again for your time and for giving this matter careful consideration.

Have a happy thanksgiving and good luck to the teams competing in tournaments this weekend

---

Subject: Re[2]: Membership Request

Ryan, we provided this information based on legal counsel from a lawyer who specializes in ONCA at the cost of the association and ultimately the players. We are comfortable that we have adequately protected the privacy of our members whilst remaining ONCA compliant. As per our published minutes for the past AGM, quorum was achieved and recognized at the start of the meeting and validated by a third party. We will not be providing any additional information and consider this request to be complete.

Christi Scarrow
VP, MGHL

Subject RE: Membership Request

> Thank you for the updated member list and for explaining the reasoning behind your approach. I appreciate the effort the Board and your legal counsel are making to handle this carefully and responsibly.
>
> That said, after reviewing the material and the relevant sections of ONCA and its General Regulation (O. Reg. 395/21), there are still a few areas where the League's records fall short of what is legally required. I want to offer these points as clarification, not criticism, so we can reach a proper and compliant outcome.
>
> 1. Address for Service - Meaning and Application
>
> Under O. Reg. 395/21 section 6(3), each member's address for service must be an actual address or means where that member can be contacted or served for League business.

It may be a residential, business, or other valid service address, but it must be specific to the member. Listing "705 Matheson Blvd E" for every member does not satisfy this definition, as that is the League's own address, not the member's.

Importantly, the service address is already collected by the League at registration, along with the member's contact information and consent for communication. Providing that information in the member register simply reflects what the League already maintains in its registration system and does not introduce any new privacy risk.

To balance privacy and safety, I am not asking for residential street addresses. I am comfortable with listing only the city of the member's service address. This meets the Act's intent while removing any risk of exposing minors' personal locations.

2. Required Record Details (Start and End Dates)

- The membership register must include, at minimum:
- The name of each current member
- Their city of service address (as above)
- Their class or group, if any
- The date on which they became a member
- For former members within the last six years, the date they became and ceased to be members

These requirements come directly from O. Reg. 395/21 section 6(3)(1) and (5).
The list provided does not include membership start dates, which are mandatory.

Although I do not require former members' contact details, the League is obligated to maintain their names and membership dates for six years. These dates are also essential to confirm voting eligibility and quorum at the 2025 AGM, which is a legitimate governance purpose recognized under ONCA section 96(5).

3. Email Addresses and Communication

Email is the League's primary method of communication. The MGHL Privacy and Record Retention Policy sections 2.4 and 3.2 confirm that email addresses are collected with consent and used for official member communication.

Accordingly, under O. Reg. 395/21 section 6(3)(3)(ii), those email addresses constitute each member's address for service where consent exists and should appear in the member register and current members list.

4. Purpose of the Request

As outlined in my statutory declaration, the purpose of my request is to facilitate member-to-member communication and other lawful organizational activities under ONCA section 96(5).
I have no interest in using the information for any purpose beyond those permitted by law.

5. Next Steps

To resolve this matter cooperatively, I would appreciate:

A revised list that includes:

- Member name
- City of service address
- Email address (where consented)
- Membership class or group
- Membership start date (and end date for those who ceased within the last six years)
- The name and contact information for your legal counsel, so I can coordinate directly if needed and simplifies the process

I appreciate the time and diligence the Board has devoted to this issue. My goal remains the same as yours: to ensure the League operates transparently, lawfully, and with full respect for the privacy and safety of its members.

Kind regards,

Ryan Morin

Subject: Re: Membership Request

Ryan, as previously noted we have engaged legal counsel. Based on their guidance, enclosed is the updated list. We have been advised of the following:

ONCA Regulation 395/21 section 6(3)3 states that in the register of members, an address could include the residential address, business address, or address for service of every current member, including the municipality,

street and number, if any, and postal code. We have been advised that in order to fulfill its legal obligation in accordance with section 96(2) of ONCA, while still protecting the safety of the players, the MGHL should provide an address for service for each player, rather than a player's residential address. The MGHL is not providing the residential addresses of the players for reasons of safety related to the players' age and gender.

You had also drawn our attention to section 9.3 of the MGHL Privacy & Record Retention Policy. That Policy applies to an individual accessing their own personal information, and it does not apply to the requests you have made under ONCA.

We consider this request complete. We have provided this response not for the intent of engaging in a debate, but rather to assist you in understanding what is being provided. This message is not to be considered a waiver of any legal privilege.

On Oct 8, 2025, at 6:30 AM, Ryan Morin <ryan.d.morin@outlook.com> wrote:

Good morning,

It's now well past a reasonable timeframe under ONCA, and past the 30 days promised in your own Privacy & Record Retention Policy. At this point, it's time to simply get this resolved.

I've been more than fair in trying to make this easy. My original request was for member names and addresses, but to protect minors I've limited it to names, email addresses, and city of residence.

Under ONCA, the League must keep a current and past member register that includes each member's name, address for service, class (if any), and the dates they became and ceased to be members.

And according to your own Privacy Policy, email addresses are collected with consent and used to communicate with members. That means they are part of the official record and can't be withheld under the excuse of privacy.

I've attached a short Carters LLP summary that clearly explains what the law requires. Hiring a lawyer to delay or resist this doesn't help anyone and only wastes the organization's money.

If legal counsel has been retained, please share their contact information. Otherwise, I'll assume the Board is managing this directly.

I've acted in good faith from the start and just want the League to follow the law. ONCA also gives members the right to contact one another about League matters, and I do plan to do that — openly and respectfully.

Please confirm when the member register will be provided.

Subject: Re: Re[6]: Membership Request

Good morning,

I appreciate the time and care being taken to consider how to handle my request responsibly, especially given the sensitivity of protecting minors' information. I share that concern.

At the same time, I would like to gently remind you that the League's own Privacy & Record Retention Policy says:

"9.3 - Subject to applicable legislation, the MGHL shall endeavour to provide this information within 30 days

of receipt of the request for information and only charge minimal fees for the purpose of satisfying its

expenses incurred in the supply of requested information. This information shall be provided in an

understandable format."

We are now past that point, and I believe everyone would benefit from a clear and timely path forward. To demonstrate my commitment to the safety of minors, I am willing to accept that the register show only the city of residence rather than full street addresses.

The difficulty here is that the current by-law structure itself creates the risk: players of all ages are defined as members, but voting rights are assigned to parents or guardians. That forces the register to link children's names to adults. ONCA doesn't require this. It only requires the register to show the member of record with their contact information.

There is a practical solution. I'd be willing to present it, when appropriate.

Thank you,

Ryan Morin

Brian is a lawyer and as a Director at Large last season, he provided guidance on our bylaws, related to ONCA. He did not act as the MGHL lawyer and was not compensated for his time.

Given that you are asking for personal information related to minors, we feel compelled to engage a lawyer formally. We anticipate that parents will be upset knowing that their addresses can be released upon request from anyone and do not want to move forward without legal advice.

Please stop sending follow up emails. We are aware of your request. We have been responsive and are taking action against it. We will notify you of next steps as soon as we hear back from our lawyer. Thank you for respecting our time.

Didn't the board bring a lawyer onboard to help with ONCA compliance? That's what was mentioned at the AGM.

Ryan, we have the register list readily available although it is changing regularly at this time of year as people register and roster.

What takes time is ensuring that we are responding appropriately to be compliant with ONCA and respecting the privacy of our members. We are not comfortable responding to your request without lawyer review. We will advise next steps.

Subject Re: Membership Request

> Hi Erin,
>
> Thanks for your note and for sending the updated list. I need to be clear on a few things:
>
> - Membership register – ONCA requires the league to keep and provide a register of members that includes names and addresses. While I previously said I didn't need addresses, that was superseded by my most recent request in this thread. The league still has a legal obligation to provide the full register.

- By-laws vs. voting – The by-laws say players are members, but in practice parents/guardians and staff are the ones voting. That conflict is why the lists are confusing and why it's important to have a proper register that complies with ONCA.

- Effort to provide – If records are being kept as the Act requires, providing the register should not be a major burden.

- Compliance and patience – I've been both compliant with the process (providing the statutory declaration) and patient in waiting. My request is beyond reasonable and directly supported by ONCA.

- Lawyer involvement – Whether the board chooses to involve a lawyer and spend money on that is up to you. This can be resolved quickly if the league simply provides what it is legally required to, and what I'm entitled to receive as a member.

I recognize this is an important time for registration. Ask the corporation to provide the complete membership register, with names and addresses, within 2 business days is reasonable.

Thank you,

Ryan Morin

Subject: Re: Membership Request

Ryan, our bylaws are consistent with other associations in defining members as players. Within section 8.6, we outline that only members of voting age may vote, in addition to parents/guardians of non-voting age players, executive members and coaching staff who are not otherwise voting on behalf of a player (8.7 outlines further details to avoid duplication of voting)

To support your request, we have updated the member file to include the name of the parent who would be voting on behalf of each player if the member is under 18 (based upon the primary registration with the OWHA in Ramp). We do have records that include addresses but you noted in a previous email that you did not require this.

As you can imagine, this is a very busy time for the association as I focus on registration and rostering. If you have further concerns regarding the compliance of our AGMs and elections, we will need to engage with a lawyer to whom we can direct your further requests. We would prefer to resolve this issue and address your concerns

without incurring legal fees that take away from the association (and ultimately the players) but equally we can not spend further time addressing this.

Thanks,

Erin
